

## Laboratory Medicine - Test Information Guide

### Lymphoproliferative Disorder

Alternate Name: LPD, Lymphoma Studies, Lymphoma Staging, Lymphocyte Studies, CD19, CD20, Monoclonal Targeted Therapies, Hematologic Disorder, Hematological Neoplasia, Blood Disorder, Blood Cancer

Department: Flow Cytometry

STAT Test Available: Yes - Hematopathologist Consult required prior to testing

TAT (Days): 2 Days

Specimen Type: Refer to [FCM-5.6.1.20](#) for a list of specimen requirements

Collection Information & Patient Prep:

- Refer to [FCM-5.6.1.20](#) Hematologic Disorder Test Information

Methodology: Flow Cytometry - Whole Blood Lysis Multiparametric Immunophenotyping

Requisition: Sunnybrook Requisition [FCM-5.6.1.1](#) - Flow Cytometry Laboratory Requisition  
Outside Referral Requisition [FCM-5.6.1.2](#) Flow Cytometry Laboratory Referral Requisition

Critical Result Ranges: N/A

Testing Referred To: N/A

Sample Volume: Refer to [FCM-5.6.1.20](#) Hematologic Disorder Test Information

Unit of Measure:

Interpretative Comment
